

**Switch Plates**

These Switch Plates match our Scene Set plates and conform to a standard single-gang plate profile, fitting 25mm surface or flush mounted back boxes.

A Wandsworth Group Series 2 range of control plate is used and the standard finish is brushed stainless steel. However, and other plate finish from the Series 2 range can be substituted. Switch Plates from our architrave range can also be requested.

The buttons can be configured as *On* and *Off*, or *Raise* and *Lower* when used to control a dimmed system. When using Architrave Plates, similar functions are available with two or four buttons.
